In 1843 the Ritter and Watts Inn in Frostburg was established as a very practical style of hostelry and provided accommodation for travelers of the nearby National Road. The foundation is constructed of stone and supports an "I" shaped frame structure, which has been covered with asbestos shingles and is two stories high and six bays wide including the side wing. The facade features one-over-one light windows and is covered by a replaced asphalt shingle, gabled roof.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Ritter Watts Inn is located at 61, 63 Broadway in Frostburg, Allegany County on the northwest side of the street at the intersection of Frost Avenue.

The former inn basically consists of a two story, six bays wide "L" shaped structure, a central block with one wing. The building is a frame structure with plain wall features and covered with replaced asbestos siding. The facade is supported by a low stone foundation without a water table. The roof of the principal facade is gabled and is covered by replaced asphalt shingles as well as the gable roof of the wing forming the "L" of the structure. Windows in the structure all feature double hung wooden sash frames with one-over-one lights and plain trim. Windows on the principal facade feature a pediment, and the front face of this main block exhibit windows grouped in twos and are evenly divided across the facade. The main entrances are located on the front southeast face of the structure. One entrance opens to the main facade; the other to the wing, and both display a transom and transom light. The entrances are covered by a three bay end porch with hip roof supported by cushion columns and brick supports and the porch is banistered. In the front gable is found a small gothic sash window with one-over-one lights. One corbeled brick chimney is located on the end of the wing and appears to be original.

The building appears structurally sound but alterations have been made on the interior when renovated for apartments.

STATEMENT OF SIGNIFICANCE

The old Ritter and Watts Inn is a mid nineteenth century hostelry which offered the traveler lodging and board for overnight accommodations. The building is representative of the utilitarian type of architecture with little decoration that was used for less fashionable hotels. A useful structure in its day, the building has been converted for apartments by the present owner and the exterior is in need of repair. It would certainly enhance the beauty of the structure and the architectural heritage of Frostburg if the exterior of the building was restored to original appearance.

Key points regarding interior architecture. Interior Remodeled for apartments

1. Floor plan
No through hall--How many rooms long and deep?
Where is stairway? Straight or winding?

With through hall--Rooms on both sides? How many?
Rooms on one side only? How many?
Is stair in through hall?
Open or enclosed? Straight--one run. Straight--landing
How many? Curved.
If not in hall, where is stair?

- 2. Wall finish: plaster, paneled, board partition Note presence of chair rail, cornice, etc.
- 3. Fireplaces: How many? Parallel to walls or diagonal in corner?
 Mantels: wood--mouldings, pilasters, columns masonry--marble(what color?), brick
- 3. Doors: on the inside of exterior doors, note the presence of applied flush boards and their direction (diagonal, vertical, horizontal). In general are doors paneled or ledge or other?
- 4. Door and window trim: plain, architrave; fluted, reeded; pilasters
- 5. Kitchen: Where is original if extant or known (marked by very large fireplace)? Separate building; wing to principal dwelling; within principal dwelling? On which floor of any of the above?
